

PURE AUSTRALIAN • QUALITY WATER

Cirrus

5-stage Reverse Osmosis Purifier

Ultimate water filtration

Metals

Fluoride

Pesticides

Bacteria

PFAS

The highest level of filtration focused where you need it most

99.98% removal of unwanted
chemicals & contaminants

0.0001 µm filtration (**5,000x finer**
than premium carbon filters)

Built-in alkaliser to retain
healthy minerals

3-year warranty with
local support

The p(RO)cess

Coarse filtration

Step 1

Clearing sediments
and solids

Fine filtration

Step 2

Reducing chlorine,
VOCs, and
chemicals

Reverse Osmosis

Step 3

0.0001-micron
purification

Mineral conditioning

Step 4

Restoring healthy
minerals

Carbon finishing

Step 5

Final checks for
taste & odour

Compact, standalone units for homes of all shapes and sizes

18L, 12L & 8L tanks for flexible footprint

Unparalleled Protection for Australians

Most homes deserve better water than they're getting. Fluoride, PFAS, sodium, and other dissolved or microscopic impurities can slip through even the finest filters, exposing your body, home, and family to unwanted chemicals and contaminants.

Forever chemicals, microplastics, and other pollutants have been linked to serious health concerns, from disrupting hormones in developing bodies to increasing risks of multiple cancers. Reverse osmosis is the highest level of protection, stripping 99.98% of impurities out of your drinking water—including the ones carbon filters can't touch.

Free Installation

for all under-sink units when purchased alongside a Design or Essential series whole-home filtration system

+ Gooseneck faucet

Black

Brushed

Chrome

+ L-shape faucet

53 Edward Street, Osborne Park WA 6017

*Non-invasive installation requires a three-way mixer tap to be purchased separately in order to replace your existing faucet rather than adding a dedicated secondary tap for purified water, as adding the second tap will often require creating a new hole in your sink or countertop.
